Report 19442

TECHNIQUE: Unenhanced multisequence multiplanar standard right knee MRI protocol.

COMPARISON: None available.

CLINICAL DATA: knee pain.

FINDINGS:

Cruciate ligaments

ACL: ACL proximal partial tear.

PCL: Normal.

Medial Compartment

Meniscus: Medial meniscus posterior horn complex tear representing complex ramp lesion.

Cartilage: mild chondropathy.

Stabilizers: Normal medial collateral ligament. Normal pes anserine tendon.

Lateral Compartment

Meniscus: Normal.

Cartilage: mild chondropathy.

Stabilizers: Normal lateral collateral ligament. Normal biceps femoris tendon. Normal popliteus tendon. Normal IT band.

Head of fibula/Tibiofemoral joint: Normal.

Patellofemoral Compartment:

Cartilage: severe patellar chondropathy.

Extensor Mechanism: Normal quadriceps tendon. Normal patellar tendon.

Effusion & Synovitis: moderate joint effusion. Normal synovium.

Popliteal fossa: Normal. No Baker's cyst.

Bones and muscle:

Bone marrow: Normal.

Fractures: None.

Soft tissue/Others: None significant.

IMPRESSION:

ACL proximal partial tear.

Medial meniscus posterior horn complex tear representing complex ramp lesion.
